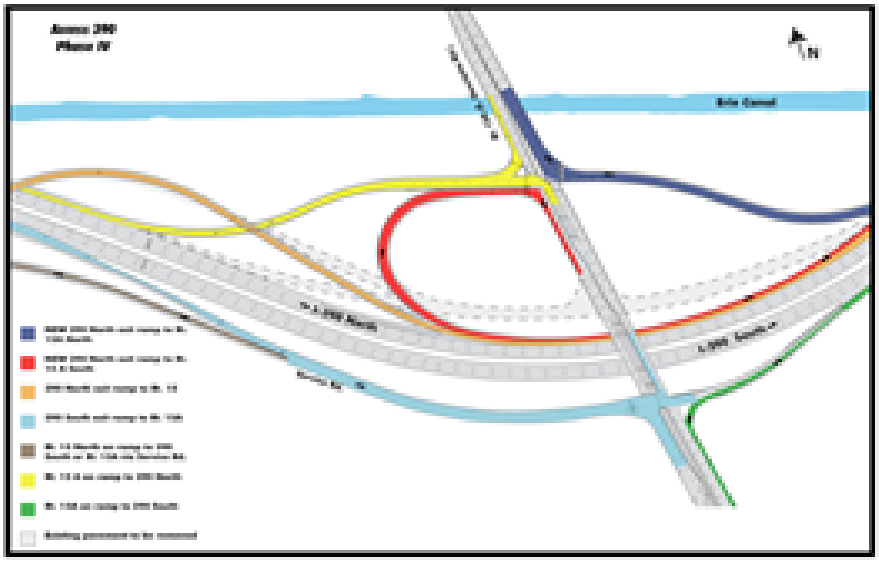
I-390 Interchange Improvements at Route 15A,
Rochester, NY

RAVI ENGINEERING & LAND SURVEYING, P.C.



PROJECT DESCRIPTION

RE&LS provided construction inspection for interchange Improvements to replace the Route 15A Bridge over the Erie Canal and reconfigure the I-390 Northbound lane and Exit 16 ramps and lanes connecting to Route 15A in the Town of Brighton, Monroe County, NY.

The work for this project included both major bridge and highway work. The highway work included new off-ramps from I-390 North to both NY-15A (E. Henrietta Road) Northbound and Southbound as well as NY-15 (W. Henrietta Road); a new on-ramp from NY-15A to I-390 Northbound; and improvements to the existing on-ramp from NY-15A to I-390 Southbound. Bridge work included minor rehabilitation of the NY-15A bridge over I-390 (BIN 1070900), replacement of the existing NY-15A bridge over the Erie Canal (BIN 4443310), and a new grade separation structure for the ramps from 15A to 390 North and from 390 North to 15.

RE&LS provided the NICET IV Office Engineer and NICET II Construction Inspector on this NYSDOT design build project responsible for record keeping using MURK procedures and NYSDOT SiteManager system. Duties included processing pay estimates, Orders-on-Contract, Force Accounts, and Certification of Materials, as well as office correspondence, final payment computations, record drawings, and staff supervision.
