

PROJECT DESCRIPTION

RE&LS provided construction inspection for the widening, rehabilitation and repair of the Kendrick Road Bridge over I-390, including a new access on ramp to northbound I-390 from the Kendrick Road Bridge located in the Town of Brighton and City of Rochester, Monroe County. (D900010, PIN 4390.67)

The project includes widening of the existing Kendrick Road Bridge (BIN 4443840), construction of a new I-390 on Ramp on piers from the Kendrick Road Bridge, aesthetic lighting, repair and/or replacement of the existing Kendrick Road Bridge superstructure and substructure elements, painting of existing weathering steel, new concrete wearing surface, new traffic signal at the new on ramp and Kendrick Road Bridge intersection, utility relocation and/or preservation, restoration of and/or modification of canal lock wall, landscaping, drainage adjustments and restoration of canal service road and trail entrance.

RE&LS provided the NICET IV Office Engineer on this NYSDOT design build project responsible for record keeping using MURK procedures and NYSDOT SiteManager system. Duties included processing pay estimates, Orders-on-Contract, Force Accounts, and Certification of Materials, as well as office correspondence, final payment computations, record drawings, and staff supervision.
