

PROJECT DESCRIPTION

The Charles T. Lunsford School is a middle school which enrolls approximately 400 students in the City of Rochester. The School was built in 1973 and the Rochester School Board renamed School 19 as the Charles T. Lunsford School in 1973.

RE&LS performed a Pre-Renovation Asbestos Survey/Inspection in accordance with 12 NYCRR Part 56-5 and 40 CFR Part 763, PCB Caulk Survey and Lead Based Paint Survey in accordance with portions of HUD Chapter 7 at School #19 in August, 2017. Following the collection and analysis of samples, RE&LS created design plans and project specifications for the scheduled abatement. Project specifications included asbestos abatement, PCB caulk remediation and lead-based paint activities.

Owner: Rochester City School District

Client: Popli Design Group, Eric Multer, (585) 364-1614

Services Provided: Environmental Engineering Services

Completion Date: 2017
