

PROJECT DESCRIPTION

This New York State Office of General Services (OGS) project was for the repair for various buildings at the Green Haven Correctional Facility. Repair work included repointing deteriorated mortar joints, replacing rusted steel lintels, repointing cracked brick locations, adding vertical expansion joints, rebuilding sections of wall, patching spalled and cracked concrete foundation walls and replacing window caulking.

RE&LS was also responsible for asbestos abatement design, specifications, opinion of probable cost and assistance with bidding for construction for this project.

Owner: The New York State Department of Corrections
and Community Supervision (NYSDOCCS)
