

PROJECT DESCRIPTION

RE&LS provided services to locate all underground utilities for a new "Turtle" stage excavation and storm sewer additions. RE&LS provided Utility Designation/Line Detection and Marking (Quality Level B) to identify subsurface utilities within the project limits, and provide horizontal accuracy consistent with applicable design and construction survey standards for improvements to this site.

Owner: New York State

Client: NYS Office of General Services

Services Provided: Utility Designation

Completion Date: 2017
