

PROJECT DESCRIPTION

Ravi Engineering and Land Surveying, P.C. (RE&LS) was responsible for a Pre-Renovation Asbestos Inspection Report for the third floor Auditorium at the historic Rundel Library. The Rundel Memorial Building is a historic library building located at Rochester in Monroe County, New York. It is framed in reinforced concrete and faced in smooth Indiana limestone. It consists of three main floors, a mezzanine, two underground levels, a catwalk level above the river, and a penthouse area for equipment was constructed in 1932.

RE&LS performed a site walk and reviewed previous asbestos survey reports. RE&LS then conducted a Pre-Renovation Asbestos Inspection. The inspection was performed in accessible spaces by a NYSDOL/EPA Certified Asbestos Inspector. The sampling was performed in accordance with AHERA regulations, 40 CFR Part 763.86 and 763.87 and NYS Code Rule 56. Sample locations were noted on both a room-by-room inspection form and a floor plan. The samples were submitted to an approved New York State Department of Health (NYSDOH) laboratory and Environmental Laboratory Approval Program (ELAP) laboratory. Upon receipt of the laboratory analysis, RE&LS prepared drawings showing the bulk sample locations and locations of the asbestos containing materials.

In addition, a site inspection for suspected PCB caulks was sampling was also conducted at the site.

Owner: City of Rochester

Client: Edge Architecture Allen Rossignol, AIA

Services Provided: Environmental Engineering, Asbestos and SEQR

Completion Date: 2015
