

PROJECT DESCRIPTION

The project involved the reconstruction of North Union Street between NY Route 417 and Main Street. The project included replacing pavement, installing new stormwater drainage, replacing traffic signals with roundabouts, a center median, streetscape enhancements, lighting, landscaping, tree grates, bicycle racks, street furniture and new sidewalk. RE&LS provided the topographic, utility, and Right of Way survey and mapping, work zone traffic control and environmental services. We also provided construction inspection for this project.
